Lawley

The solution to managing safety and loss control.

eAudit

Capture your safety in a measurable, reportable format with the Great Lakes' eAudit tool.

eAudit helps quantify your safety efforts and helps guide you to better results.

eAudit will allow you to:

- o Benchmark Safety
- o Ensure Accountability
- o Track Progress
- o Identify Trends

The Dashboard provides a graphic output allows you to see your progress, identify areas that need improvement and share information with your management team to enhance your safety efforts. Health care organizations can also track their safety efforts to improve JCAHO compliance through its safety incident tracking capabilities.

Loss Control

- Customized Risk Management programs and services
- New York State Certified code rule 59 and 60 safety consultation
- Business disaster and continually planning
